Wireless Connectivity

Elevate learning outcomes with Galileo One Pro

Carefully designed for classrooms and packed with most advanced features so much so that it will change the way you teach for good.

Just place the unit onto any regular TV/Panel (32" to 75") to turn it into a fully functional digital whiteboard for exponentiating the teaching & learning experience via the built-in award winning EyeRIS optical 3D tracking technology. A minimalist design, easy setup and a powerful cloud connected software suite make Galileo One Pro indispensable for a smart classroom setup.

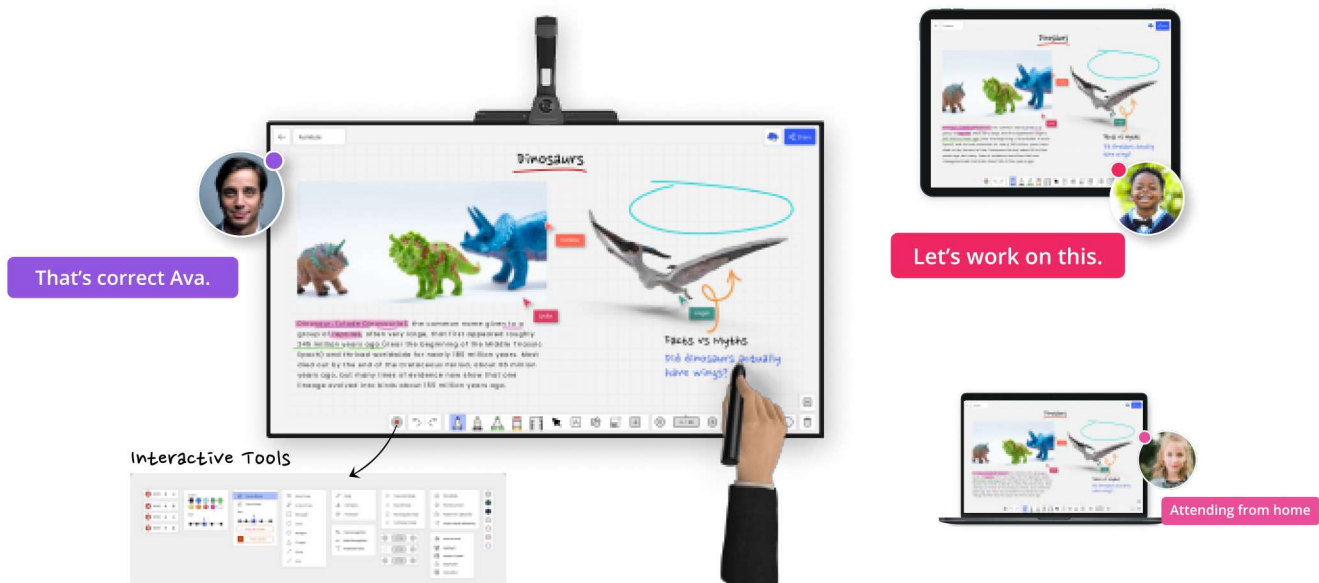

Interactivity with the Collaborative Canvas

i. Converting any TV into Digital Whiteboard

Lag free high precision writing experience with palm rejection capability which allows you to freely rest your palm on the panel and write, like you use a whiteboard.

ii. AiCanvas - Online Teaching Canvas

Allows teachers to make the classes interactive & engaging with the help of digital tools & multimedia content like images, videos, animations etc. This collaborative teaching canvas can be accessed by teachers and students at the same time from anywhere, any device. With this, teachers can keep their students focussed by engaging them to take part in quizzes, group activities, solving puzzles etc during the class.

Wireless Content Sharing & File Transfer

Galileo provides hassle free content presentation from any of the personal devices like laptop, PC or mobile. The presentation can be shared onto the main screen even when sitting at the farthest end of the room. Upto 4 screens can be casted together simultaneously. Even individuals files can be wirelessly sent from the personal devices to the main display.

Ability to Download Apps

The built in powerful processor allows the users to download apps directly via play store and access it. In case of online teaching, teachers can directly download any video conferencing application like Zoom, Teams or Google Meet and start their classes. Galileo gives the advantage to seamlessly run both in-person & online class without the need of any external PC.
